ÅRSREGNSKAP FOR REGNSKAPSÅRET 2024 - GENERELL INFORMASJON

Journalnummer:	2025 657415

Enheten

Organisasjonsnummer:	953 133 210
Organisasjonsform:	Aksjeselskap
Foretaksnavn:	INPEX IDEMITSU NORGE AS
Forretningsadresse:	Lysaker torg 25 1366 LYSAKER

Regnskapsår

Årsregnskapets periode:	01.01.2024 - 31.12.2024

Konsern

Morselskap i konsern:	Nei

Regnskapsregler

Regler for små foretak benyttet:	Nei
Benyttet ved utarbeidelsen av årsregnskapet til selskapet:	Forenklet IFRS

Årsregnskapet fastsatt av kompetent organ

Bekreftet av representant for selskapet:	Kjartan Eide
Dato for fastsettelse av årsregnskapet:	12.03.2025

Grunnlag for avgivelse

År 2024: Årsregnskap er elektronisk innlevert.
År 2023: Tall er hentet fra elektronisk innlevert årsregnskap fra 2024.

Det er ikke krav til at årsregnskapet m.v. som sendes til Regnskapsregisteret er undertegnet. Kontrollen på at dette er utført ligger hos revisor/enhetens øverste organ. Sikkerheten ivaretas ved at innsender har rolle/rettighet for innsending av årsregnskapet via Altinn, og ved at det bekreftes at årsregnskapet er fastsatt av kompetent organ.

To the General Meeting in Inpex Idemitsu Norge AS

INDEPENDENT AUDITOR'S REPORT

Opinion

We have audited the financial statements of Inpex Idemitsu Norge AS (the Company), which comprise the balance sheet as at 31 December 2024, the income statement, statement of comprehensive income and statement of cash flow for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion

- the financial statements comply with applicable statutory requirements, and
- the financial statements give a true and fair view of the financial position of the Company as at 31 December 2024 and its financial performance and cash flows for the year then ended in accordance with simplified application of international accounting standards according to section 3-9 of the Norwegian Accounting Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the Company in accordance with the requirements of the relevant laws and regulations in Norway and the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors and managing director (management) are responsible for the information in the Board of Directors' report and the other information presented with the financial statements. The other information comprises the report on payments to governments. Our opinion on the financial statements does not cover the information in the Board of Directors' report and the other information presented with the financial statements.

In connection with our audit of the financial statements, our responsibility is to read the information in the Board of Directors' report and for the other information presented with the financial statements. The purpose is to consider if there is material inconsistency between the information in the Board of Directors' report and the other information presented with the financial statements and the financial statements or our knowledge obtained in the audit, or otherwise the information in the Board of Directors' report and for the other information presented with the financial statements otherwise appears to be materially misstated. We are required to report that fact if there is a material misstatement in the Board of Directors' report and the other information presented with the financial statements. We have nothing to report in this regard.

Based on our knowledge obtained in the audit, it is our opinion that the Board of Directors' report

- is consistent with the financial statements and
- contains the information required by applicable statutory requirements.

Shape the future
with confidence

Responsibilities of management for the financial statements

Management is responsible for the preparation of the financial statements that give a true and fair view in accordance with simplified application of international accounting standards according to section 3-9 of the Norwegian Accounting Act, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Accounting principles

General
The financial statements of IIN have been prepared in accordance with simplified IFRS pursuant to the Norwegian Accounting Act § 3-9 and regulations regarding simplified application of IFRS issued by the Norwegian Ministry of Finance on 3 November 2014. Dividend is booked in accordance with the Norwegian Accounting Act, cf § 3-1 (3) of the above regulations. The accounting language for IIN is English. The accounting currency is Norwegian Krone NOK.

BASIS OF PREPARATION
The financial statements are prepared on the historical cost basis with some exceptions, as detailed in the accounting policies set out below. The subtotals and totals in some of the tables may not equal the sum of the amounts shown due to rounding. Expenses related to operating activities in the statements of income are presented as a combination of function and nature, in conformity with industry practice. Depreciation, amortisation and net impairment losses are presented in separate lines based on their nature while operating expenses and exploration expenses are presented on a functional basis.

The Accounting Act § 6-1 requires salaries to be presented separately in the statements of income. Such detailed information is not available in the license accounts, and salaries from the license accounts are therefore included in the respective lines in the statements of income.

The statements of cash flow have been prepared in accordance with the indirect method. Interest in joint operations (arrangements in which IIN and other participants have joint control and each of the parties have rights to the assets and obligations for the liabilities, rating to their respective share of the arrangement) and similar arrangements (licenses) outside the scope of IFRS 11 are recognised on a line-by-line basis, reflecting the company`s share of assets, liabilities, income, and expenses.

CLASSIFICATIONS
Assets linked to the flow of goods, receivables falling due within one year, and assets not determined for permanent ownership and use are classified as current assets. Other assets are classified as non-current. Liabilities falling due within one year are classified as current liabilities. Other liabilities are classified as non-current. Cash and cash equivalents include bank deposits.

REVENUE RECOGNITION
IFRS 15 applies, with limited exceptions, to all revenue arising from contracts with customers. IFRS 15 establishes a five-step model to account for revenue arising from contracts with customers and requires the revenue to be recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. IIN recognises revenue upon satisfaction of the performance obligations for the amounts that reflect the consideration entitled in exchange for goods. Revenue associated with the sale and transportation of crude oil, natural gas and petroleum products and other merchandise are recognised when a customer obtains control of the goods, which normally will be when title passes at point of delivery of the goods, based on the contractual terms of the agreements. When IIN has lifted and sold more than the ownership interest, an accrual is recognised for the cost of the overlift. When IIN has sold less than the ownership interest, costs are deferred for the underlift. Tariff revenue and other revenue is recognised when title and risk pass to the customer.

DEFERRED TAXES / TAX EXPENSE
Tax expense comprises payable tax and deferred tax. The deferred tax asset or liability is calculated based upon net temporary differences between assets and liabilities recognised in the financial statements and their bases for tax purposes after offsetting for tax loss carry-forwards and special tax deductions. The full liability method is followed and the asset or liability is not discounted to a net present value. Tax rates for corporate tax (22 %) and special tax (71.8 %) are used when calculating deferred tax.

For corporate tax, offshore development costs are depreciated straight line over 6 years. For special tax, such development costs are expensed in the year of investment. Capital expenses on the Norwegian

Continental Shelf no longer earn uplift on the total capital expenses. The effect of uplift from previous years is recognised as earned in the year it becomes deductible and included in payable tax calculation. No deferred tax asset is recognised for uplift that will become deductible in the future.

Certain temporary changes in the Petroleum Tax Law were enacted in June 2020. The changes in tax law included a temporary rule for depreciation and uplift, whereby all investments incurred for income year 2020 and 2021 including 24 % uplift were deducted for special tax (56 %) in the year of investment. The temporary tax rules are also applicable for certain development projects sanctioned within the end of 2022.

In 2022, the special tax was converted to a cash flow-based tax, with no uplift.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment is reflected at cost, less accumulated depreciation and accumulated impairment losses. The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into operation, the initial estimate of an asset retirement obligation, if any, exploration cost transferred from intangible assets and, for qualifying assets, borrowing costs.

Expenditure on major maintenance or repairs comprises the cost of replacement assets or parts of assets, inspection costs and overhaul costs. Where an asset or part of an asset is replaced and it is probable that future economic benefits associated with the item will flow to the company, the expenditure is capitalised. All other maintenance costs are expensed as incurred.

Oil and gas producing properties are depreciated individually using the unit-of-production (U.O.P.) method as proved and probable developed reserves are produced. The rate of depreciation is equal to the ratio of oil and gas production for the period over the estimated remaining proved and probable reserves expected to be recovered at the beginning of the period. Any changes in the reserves estimate that affect unit-of-production calculations, are accounted for prospectively over the revised remaining reserves. Oil and gas producing assets are depreciated on a field level. Fields in development stage will not be amortised before production from that field commences. The company includes undeveloped reserves (proved and probable reserves but not contingent resources) in the denominator, and consequently includes the future development expenditures necessary to bring those reserves into production in the basis for depreciation.

The estimated useful lives of property, plant and equipment are reviewed on an annual basis and changes in useful lives are accounted for prospectively. An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in Other income or Operating expenses, respectively, in the period the item is derecognised.

If the net recorded value after deduction of accumulated depreciation for a field exceeds its net present value (calculated as future cash flows discounted at the weighted average cost of capital), an impairment loss is charged. For the purpose of impairment testing, assets are grouped together at the lowest possible level at which asset-specific cash flows can be identified. Future cash flows are based on oil price forecasts from ERC Equipoise Ltd., dry gas forward prices, USD/NOK rate at the balance sheet date and long-term forecasts for production and expenditure. Previous impairment is reversed if the basis for impairment is no longer present.

PRODUCTION RIGHTS

Production rights (cost related to the acquisition of licenses) related to unproved property are initially classified as intangible assets. Production rights are reclassified from Intangible assets to Production facilities under development after the plan for development has been approved. Production rights are depreciated using the U.O.P. method from start-up of production together with the field development costs.

FURNITURE, FIXTURES, AND CARS
Fixed assets are recorded in the balance sheet at cost after deduction of accumulated ordinary depreciation. Ordinary depreciation is based on cost and is calculated on a straight line basis over the estimated economic life of the asset, which is 3 or 5 years.

EXPLORATION COSTS
Exploration costs are accounted for in accordance with the Successful efforts method. Under this method, all costs associated with the exploration of licenses are expensed as incurred, with the exception of drilling and testing costs of exploration wells where a commercial discovery is made. Exploration wells where the status of a discovery is pending are initially capitalised as Intangible assets, and impaired fully if the discovery is later deemed non-commercial. If a pending well turns out to be dry or non-commercial after the balance sheet date but before the account closing date, such information is recognised as a subsequent event and the drilling and testing cost for the well is fully expensed.

Exploration costs can remain capitalised for more than one year. The main criteria for continued capitalisation are that there must be concrete plans for future drilling in the license, a development decision is expected in the near future, or the well is pending capacity on existing infrastructure.

If the well discovers commercial reserves, the capitalised exploration costs are reclassified to Production facilities under development after the plan for development has been approved. Exploration costs are depreciated using the U.O.P. method from start-up of production together with the field development costs.

ASSET RETIREMENT OBLIGATIONS (ARO)
Provisions for ARO are recognised when the company has an obligation (legal or constructive) to dismantle and remove a facility or an item of property, plant and equipment and to restore the site on which it is located, and when a reasonable estimate of that liability can be made. The amount recognised is the present value of the estimated future expenditure determined in accordance with local conditions and requirements. Cost is estimated based on current regulation and technology, considering relevant risks and uncertainties. The discount rate used in the calculation of the ARO is determined using an estimated risk free interest rate, adjusted for risk specific to the liability.

Normally an obligation arises for a new facility, such as an oil and natural gas production or transportation facility, upon construction or installation. The provisions are classified under Provisions in the balance sheets.

When a provision for ARO is recognised, a corresponding amount is recognised to increase the related property, plant and equipment and is subsequently depreciated as part of the costs of the facility or item of property, plant and equipment. Any change in the present value of the estimated expenditures is reflected as an adjustment to the provision and the corresponding property, plant and equipment. When a decrease in the ARO provision related to a producing asset exceeds the carrying amount of the asset, the excess is recognised as a reduction of depreciation, amortisation, and net impairment losses in the statements of income. When an asset has reached the end of its useful life, all subsequent changes to the ARO provision are recognised as they occur in operating expenses in the statements of income.

LEASING
IIN has one lease agreement within the scope of IFRS 16, as a lessee. For this lease agreement the company has recognised a lease liability and a corresponding Right-of-Use (RoU) asset in the balance sheet. IIN has applied a prospective approach with no restatement of comparative figures. The lease liability at the date of the initial application was measured at the present value of the remaining lease payments, discounted using the company's approximate incremental borrowing rate of 3.2 %. The borrowing rate is derived from the terms of the group's existing credit facilities. RoU assets are depreciated straight line over the lease term as this is ordinarily shorter than the useful life of the assets.

A lease within the scope of IFRS 16 may be related to the company's production licenses and fields. If the license operator has entered into a lease contract on behalf of the field, IIN will account for the lease in accordance with IFRS 16. Whether a contract is entered into on behalf of the license is subject to a contract-specific assessment, but the general principle is that there needs to be a direct link between the lease contract and the license or field on which the RoU asset shall be used.

IIN has applied the exemption for short-term leases (12 months or less) and low value leases. This means that related lease payments will not be recognised in the balance sheet, but expensed or capitalised in line with the accounting treatment for other non-lease expenses. The company will exclude the non-lease components when measuring the lease liability. The company has used the same implementation date and method as the parent company.

PENSION COSTS

The company finances a collective defined benefit retirement plan and a collective defined contribution retirement plan which cover all its local employees. These plans are administered by a Norwegian insurance company.

The defined benefit plan was closed for new employees on 30 September 2022. In accordance with actuarial calculations the net present value of the future pension obligations is estimated and compared with the value of all funds paid and previously saved. The difference is shown in the balance sheets under Provision for liabilities or Financial fixed assets. Paid pension premiums and changes in net liability are recorded under Personnel expenses in the statements of income, except for Remeasurement gain/loss which is included in Other comprehensive income.

Pension obligations are recorded in accordance with IAS 19.

FOREIGN CURRENCY TRANSACTIONS

Transactions in foreign currencies are translated at the exchange rates prevailing at the time of the transaction. Unrealised gains and losses arising from the individual revaluation of long-term assets and liabilities at year-end rates are recognised through the statements of income. Short-term assets and liabilities are revalued individually at year-end rates, and unrealised gains and losses are recognised through the statements of income.

FINANCIAL INSTRUMENTS

Financial instruments, which
- are classified as current assets,
- are included in a trading portfolio, and held with the intention to sell
- are traded on a stock exchange, authorised market or equivalent regulated foreign market, and
- have satisfactory diversity of ownership and liquidity

are recognised at fair value on the balance sheet date. Other investments are recognised at the lower of average acquisition cost and fair value at the balance sheet date.

ACCOUNTS RECEIVABLE

Trade receivables and other receivables are recognised at nominal value, less the accrual for expected losses of receivables.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash, bank deposits, and other short-term highly liquid investments with an original due date of three months or less.

INVENTORIES AND OVER-/UNDERLIFT OF PETROLEUM PRODUCTS

Inventories are recognised at the lower of cost and net realisable value and booked under Current assets. Liabilities arising from lifting more than the company's share of the field's petroleum production (overlifting) are valued at production cost, and booked under Other current debt. Full production cost including indirect cost is used for crude oil. For natural gas liquids and dry gas, full production cost after separation from crude oil is included.

RESEARCH AND DEVELOPMENT
The company's research and development costs are immaterial and expensed as incurred.

CHANGES IN ACCOUNTING STANDARDS
No changes in accounting standards with effect for IIN came into force in 2024.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS
Preparation of the financial statements requires the company to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses, as well as disclosures of contingencies. Actual results may ultimately differ from the estimates and assumptions used. The estimates and the underlying assumptions are reviewed on an ongoing basis. Changes in estimates will be recognised when new estimates can be determined with certainty. The matters described below are considered to be the most important in understanding the key sources of estimation uncertainty that are involved in preparing the financial statements and the uncertainty that could most significantly impact the amounts reported on the result of operations, financial position and cash flows.

PROVED AND PROBABLE OIL AND GAS RESERVES
Proved and probable oil and gas reserves have been estimated on the basis of industry standards. The estimates are based on internal information and information received from the operators. Proved and probable oil and gas reserves consist of the estimated quantities of crude oil, natural gas, and condensates shown by geological and technical data to be recoverable with reasonable certainty from known reservoirs under existing economic and operational conditions, i.e. on the date that the estimates are prepared. Current market prices are used in the estimates. Proved and probable reserves and production volumes are used to calculate the depreciation of oil and gas fields by applying the unit-of-production methodology. Reserve estimates are also used as basis for impairment testing of licence-related assets. Changes in petroleum prices and cost estimates may change reserve estimates and accordingly economic cut-off, which may impact the timing of assumed decommissioning and removal activities. Changes to reserve estimates can also be caused by updated production and reservoir information. Future changes to proved and probable oil and gas reserves can have a material effect on depreciation, life-of-field, impairment of licence-related assets, and operating results. Reference is made to note 18.

CARRYING VALUE OF INTANGIBLE EXPLORATION AND EVALUATION ASSETS
Where a project is sufficiently advanced, the recoverability of intangible exploration assets is assessed by comparing the carrying value to internal and operator estimates of the net present value of projects. Intangible exploration assets are inherently judgemental to value. The amounts for intangible exploration and evaluation assets represent active exploration projects. These amounts will be written off to the statements of income as exploration cost or impairment loss unless commercial reserves are established or the determination process is not completed and there are no indications of impairment. The outcome of ongoing exploration, and therefore whether the carrying value of exploration and evaluation assets will ultimately be recovered, is inherently uncertain. Reference is made to note 13.

IMPAIRMENT/REVERSAL OF IMPAIRMENT
Changes in the expected future value/cash flows of Cash-Generating Units (CGUs) result in impairment if the estimated recoverable value is lower than the book value. Estimates of recoverable value involve the application of judgment and assumptions, including in relation to the modelling of future cash flows to estimate the CGUs' value in use or fair value. The evaluation of impairment requires long-term assumptions concerning a number of often volatile economic factors, including future oil prices, oil production, currency exchange rates, and discount rates. Such assumptions require the estimation of relevant factors such as long-term prices, the levels of capex and opex, production estimates, and decommissioning costs. These evaluations are also necessary to determine a CGU's fair value unless information can be obtained from an actual observable market transaction. Reference is made to note 12 and 14.

ASSET RETIREMENT OBLIGATIONS
The company has obligations to decommission and remove offshore installations at the end of the production period. The costs of these decommissioning and removal activities require revisions due to

changes in current regulations and technology while considering relevant risks and uncertainties. Most of the removal activities are many years into the future, and the removal technology and costs are constantly changing. The estimates include assumptions of the time required and the day rates for rigs, marine operations, and heavy lift vessels that can vary considerably depending on the assumed removal complexity. As a result, the initial recognition of the liability and the capitalised cost associated with decommissioning and removal obligations, and the subsequent adjustment of these balance sheet items, involve the application of significant judgement. Reference is made to note 17.

TAX

The company may incur significant amounts of income tax payable or receivable, and recognises significant changes to deferred tax or deferred tax assets. These figures are based on management's interpretation of applicable laws and regulations, and on relevant court decisions. The quality of these estimates is highly dependent on management's ability to properly apply a complex set of rules and identify changes to the existing legal framework. Reference is made to note 11.

NOTE 1 ORGANISATION

INPEX Idemitsu Norge AS ("IIN" or "the company") was founded on 25 September 1989 and is incorporated and domiciled in Norway. The company changed its name from Idemitsu Petroleum Norge AS to INPEX Idemitsu Norge AS on 31 January 2022, following a change of ultimate majority shareholder. The address of its registered office is Lysaker Torg 25, 1366 Lysaker, Norway. IIN is a subsidiary in the INPEX Group focusing on exploration, appraisal, development, and production opportunities on the Norwegian Continental Shelf. The financial statements of the company for the period ending 31 December 2024 were authorised for issue by the Board of Directors on 12 March 2025.

NOTE 2 MANAGEMENT OF CAPITAL AND FINANCIAL RISK

MANAGEMENT OF CAPITAL

The company's objective when managing capital is to provide a stable dividend to the shareholders and at the same time keep sufficient capital to meet its committed work program requirements and future investments. The company has no long-term loans, and deposits excess liquidity in the parent company. The company is not subject to any externally imposed capital requirements. The company's objectives, processes, and policies have not been changed compared to the previous year.

GENERAL INFORMATION RELEVANT TO FINANCIAL RISKS

IIN`s activities expose the company to market risk (including commodity price risk and currency risk), liquidity risk, and credit risk. The company's approach to risk management includes assessing and managing risk with focus on achieving the highest risk-adjusted returns for the shareholders.

COMMODITY PRICE RISK

The company operates in the crude oil and natural gas market and is exposed to fluctuations in hydrocarbon prices that can affect revenues. No hedging activities are carried out to reduce the market price risk.

CURRENCY RISK

The company has most of its income in USD and cost in NOK. Most of the USD to NOK currency exchange risk is covered by short-term foreign exchange contracts. Risk reductions by using the mentioned financial instruments will never exceed the actual risk position.

LIQUIDITY RISK

Liquidity risk is the risk that the company will not be able to meet obligations of financial liabilities when they become due. The purpose of liquidity management is to make certain that the company has sufficient funds available at all times to cover its financial liabilities. The company has no long-term loans and a comfortable cash position. The cash flow from fields in production is strong and sufficient to cover the company's obligations even when the crude oil price is fairly low. It is expected that the company has substantial loan capacity based on the security of its producing assets.

CREDIT RISK

Credit risk arises from cash and cash equivalents, favourable derivative financial instruments, and deposits with banks and financial institutions. There are also minor credit exposures related to trade receivable and overcall joint venture toward license partners. The company's license partners are credit worthy oil companies and cash and cash equivalents are receivable from major banks and the parent company.

NOTE 3 ASSET ACQUISITIONS AND DISPOSALS

ACQUISITION OF EXPLORATION LICENSES

License	Interest acquired
PL 1217	40 %
PL 1219	50 %
PL 1231	30 %
PL 1233	50 %
PL 1194 B	30 %

IIN was awarded interests in PL 1217, PL 1219, PL 1231, PL 1233, and PL 1194 B in the 2023 APA round.

In June 2023, IIN signed a Sales and Purchase Agreement (SPA) for the sale of the company's shares in Statfjord Øst and Sygna to Longboat Energy Norge AS (now JAPEX Norge AS). The transaction was completed 31 January 2024. A gain of 127 million NOK has been booked as a result of the transaction. The divestment will only have a marginal effect on the company's production and reserves.
The effective date of the transaction for tax purpose was 1 January 2023.

In December 2024, IIN signed a Sales and Purchase Agreement (SPA) for the purchase of 30 % interest in the Trudvang CCS license from Sval. The effective date of the transaction for tax purpose is 1 January 2024. The completion of the transaction will take place in 2025.

DISPOSAL OF EXPLORATION LICENSES

License	Interest disposed
PL 090 F	40 %
PL 1130	60 %
PL 882 B	20 %

The exporation licenses PL 090 F, PL 1130 and PL 882 were relinquished in 2024.

NOTE 4 INVESTMENTS IN LICENSE INTERESTS

Production license	Block(s)	Producing fields	Operator	Interest	
057	34/4	Snorre	Equinor	9.6 %

1233	6605/3, 6705/12		OMV	50 %	

1) According to the final redetermination effective from 1 January 2020, IIN holds a 3.3 % interest in the unitised Vega field.

2) According to the final unitisation agreement with PL 248 E, IIN holds a 28.8 % interest in the unitised Fram H-Nord field

NOTE 5 REVENUES AND OTHER INCOME

Revenues	**2024**	**2023**
amounts in '000 NOK		
Crude oil	5 560 264	6 750 786
NGL	226 762	212 398
Dry gas	1 720 446	1 961 230
Tariff income	13 690	17 455
Gain from divestment of assets	126 971	
Total	**7 648 133**	**8 941 869**

All revenues are generated from the Norwegian Continental Shelf (NCS). The following customers accounted for more than 10 % of the sales in 2024:
- Equinor
- Petroineos Trading Ltd.
- Shell Energy Europe Ltd.

Gain from the transaction with Longboat JAPEX (now JAPEX) was 126 971 MNOK, cf Note 3.

NOTE 6 OPERATING AND EXPLORATION EXPENSES

Operating expenses	**2024**	**2023**
amounts in '000 NOK		
Production cost	684 846	677 490
Processing cost	179 257	198 394
Transportation cost	151 643	128 691
Change in inventory and over/underlift	44 630	42 376
Other cost	1 427	1 516
Total	**1 061 804**	**1 048 468**

Exploration expenses	**2024**	**2023**
amounts in '000 NOK		
License exploration expense	177 622	393 596
Exploration expense outside license accounts	465 178	34 705
Total	**642 800**	**428 301**

NOTE 7 SALARY COSTS AND BENEFITS, REMUNERATION TO THE CHIEF EXECUTIVE, BOARD, AND AUDITOR

Salary costs	**2024**	**2023**
amounts in '000 nok		
Salaries	196 990	177 809
Employment tax	39 952	35 426
Pension costs	24 000	27 600
Other benefits	9 309	9 051
Total	**270 251**	**249 886**

In 2024, the company employed 75 man-years, compared to 72 in 2023. At the end of the year the company had 78 employees.

Remuneration to Managing Director	**2024**	**2023**
amounts in '000 NOK		
Salaries	5 460	5 634
Other remuneration	1 216	1 232
Total	**6 675**	**6 866**

No employee has options, profit-sharings, or severance pay agreements at year-end 2024. One board member has a house loan of 2.9 million NOK and a car loan of 0.2 million NOK from the company. Another board member has a car loan of 0.4 million NOK from the company. Apart from that, there are no loans or pledges of security to the Managing Director or board members. The amount of loan to employees was 20,8 million NOK at 31 December 2024 (31 December 2023: 21,1 million NOK).

AUDITOR

Auditor fee	**2024**	**2023**
amounts in '000 NOK		
Audit fee (EY)	1 145	1 070
Other audit related services	0	0
Total	**1 145**	**1 070**

NOTE 8 PENSION

IIN has a defined benefit group pension insurance with DNB covering 38 local employees and 7 retirees. The company also has a top hat with DNB covering 33 local employees and 5 retirees. In addition, IIN has a defined contribution pension scheme covering 20 local employees and 1 retiree. The defined benefit schemes were closed for new employees on 30 September 2022. The group pension insurance is in accordance with the requirements stated in Norwegian pension legislation.

Net defined benefit pension obligations are recorded under Provisions for liabilities in the balance sheets. The annual change in net obligation is recorded as expense under Other operating expenses in the statements of income, except Remeasurement gain/loss which is booked as Other comprehensive income. Accounting for pension cost is done in accordance with IAS 19. Pension rights for Japanese employees are covered in Japan by group companies.

all amounts in '000 NOK	**2024**	**2023**
Service cost	22 596	25 064
Financial cost	2 376	2 674
Net pension cost	**24 972**	**27 738**
Remeasurement loss (gain) booked to Other comprehensive income	13 953	-15 323

Estimated pension obligations	305 219	273 131
Pension plan assets (year-end value)	219 729	191 906
Net pension obligation at year-end	**85 490**	**81 225**
Economical assumptions		
Discount rate (OMF rate)	3.90 %	3.70 %
Expected compensation increase	4.00 %	3.75 %
Expected return on pension plan assets	3.90 %	3.70 %
Adjustments in National Insurance base rate	3.75 %	3.50 %
Adjustments in pensions	3.75 %	3.50 %
Adjustments in pensions >12G	2.40 %	2.40 %

The actuary calculations are based on mortality table K2013BE and disability tariff IR02.

NOTE 9 RESTRICTED BANK DEPOSITS

Amounts in '000 NOK	**2024**	**2023**
Withheld employee taxes	17 206	16 453
Mortgaged deposit related to Gassco bank guarantee*	50 566	50 541
Restricted deposit accounts related to office and apartment rent agreements	3 559	5 249
Total	**71 331**	**72 244**

*As required by Gassco, the company has obtained a bank guarantee for the committed tariff payments in Gassled for the two coming years.

NOTE 10 FINANCIAL ITEMS

amounts in '000 NOK	**2024**	**2023**
Foreign exchange gain	883 907	860 003
Interest income	29 921	43 630
Interest income from related company	414 679	348 811
Foreign exchange loss	-953 920	-880 192
Accretion expense asset retirement obligations	-76 644	-87 639
Accretion expense lease liabilities	-449	-604
Other interest expense	-4 382	-11 911
Total	**293 112**	**272 097**

NOTE 11 INCOME TAXES

NET INCOME TAX		
all amounts in '000 NOK	**2024**	**2023**

Temporary changes in the Petroleum Tax Law were enacted on 19 June 2020. The changes in tax law included a temporary rule for depreciation and uplift, whereby all investments incurred for income year 2020 and 2021 including 12.4 % uplift can be deducted for special tax (71.8 %) in the year of investment. The temporary changes will also be applicable for investments up to and including the year of production start in accordance with new PDOs submitted within 31 December 2022 and approved within 31 December 2023.

In 2022, the special tax was converted to a cash flow based tax, with no uplift.

NOTE 12 PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment on Statfjord East and Sygna has been derecognized following the divestment of these two assets.

Production facilities in operation are subject to Unit-of-Production (U.O.P.) depreciation. Production facilities under development are not depreciated before production commences. Furniture and office equipment are depreciated according to the linear method, according to their useful lives (3 or 5 years).

NOTE 13 INTANGIBLE ASSETS

all amounts in '000 NOK	**Capitalised exploration wells**
Carrying amount at 01/01/2023	653 954
Additions 2023	94 349
Expensed/impaired exploration wells	0
Carrying amount 31/12/2023	**748 302**
Additions 2024	413 639
Expensed/impaired exploration wells	-15 580
Carrying amount 31/12/2024	**1 146 361**

Capitalised exploration wells are transferred to Production facilities under development when a development of the discovery has been sanctioned.

NOTE 14 IMPAIRMENTS

Impairment tests of individual cash-generating units are performed when impairment triggers are identified. It was concluded that no impairment was required for 2024. In the assessment of whether an impairment is required 31 December 2024, IIN has used the below average of price forecasts published by ERCE, a future cost inflation rate of 2 % per annum and a discount rate of 8 %, to calculate the future post-tax cash flow.

Year	**Crude oil price (USD/bbl)**
2025	76
2026	78
2027	79
2028	81
2029	83
2030 ->	CPI adjustment

For dry gas, the forward prices as of 31.12.24 have been used.

NOTE 15 SHORT-TERM RECEIVABLES AND OTHER CURRENT DEBT

Accounts receivable is booked at nominal value, without any accrual for losses. All the company's customers are large, international oil companies.

Other short-term receivables consist mainly of overcall, joint venture receivables, prepaid expenses and other receivables related to IIN's joint venture licenses. Other current debt consists mainly of undercall, joint venture payables, and accruals and other payables related to IIN's joint venture licenses.

NOTE 16 EQUITY AND SHAREHOLDERS

all amounts in '000 NOK	**Share capital**	**Retained earnings**	**Total equity**
Equity 01/01/2024	727 900	5 963 542	6 691 442
Profit 2024		1 364 286	1 364 286
Extraordinary dividend 2024		-668 652	-668 652
Remeasurement gain/loss booked to equity (pension)		-3 070	-3 070

Equity 31/12/2024	727 900	6 656 107	7 384 007
Remeasurement loss 2024 (Pension)			-13 953
Booked to equity			-3 070
Booked to deferred tax			-10 884
Accumulated remeasurement loss (-gain) booked to equity (post tax)			11 590

The share capital consists of 7 279 shares of NOK 100 000, all fully paid. All shares are owned by INPEX Norway Co. Ltd., in Japan (former Idemitsu Snorre Oil Development Co. Ltd.,). Group accounts for 2024 are prepared by the ultimate parent company INPEX Corporation and are available at www.inpex.co.jp. The ultimate parent company is located in Tokyo, Japan.

NOTE 17 ASSET RETIREMENT OBLIGATIONS

The Norwegian government may, at the termination of production or expiration of a license, require IIN to remove offshore installations. With current and expected future fishery and environmental concerns, it is likely that the Norwegian government or international institutions and legislation will require the installations to be removed. It is also necessary to close down all production and injection wells as their use is completed. Furthermore, IIN is required to cover its share of removal of Gassled pipelines and installations.

Abandonment and decommissioning obligations are recorded at net present value. Reference is made to Accounting Principles.

all amounts in '000 NOK	**2024**	**2023**
Asset retirement obligation 1.1	2 804 575	2 767 232
Change of estimate	26 122	51 124
Effect of change in risk free interest rate	-302 609	-33 981
Actual decommissioning expenditure	-195 999	-67 439
Interest effect on the NPV obligation	76 644	87 639
Derecognition due to divestment of assets	-96 439	0
Asset retirement obligations 31.12	**2 312 294**	**2 804 575**

In the calculation of net present value at year-end 2024, an inflation rate of 2 % and a discount rate of 3.9 % have been used. For the Knarr field the obligation has not been discounted. At year-end 2023, the discount rate was 3.3%. 92.6 million NOK of the liability is short-term at year-end 2024 (246.8 million NOK at year-end 2023).

The discount rate is a risk-free rate based on the NOK currency and time horizon of the individual oil and gas fields. IIN no longer includes a credit premium in the discount rate.

IIN obtains abandonment and decommissioning cost estimates from the operators. The estimates are reviewed by IIN's own technical staff. The removal estimates are based upon complete removal and onshore disposal of any installations not below the seabed. Pipelines will be cleaned and left buried. Well closure cost includes cleaning wells and installing cement plugs in the permeable zones and upper part of the well.

NOTE 18 RESERVES (UNAUDITED)

The reserve numbers shown below are the estimated total producible remaining reserves in the currently producing and developing fields.

The estimates represent the company's share of proved and probable reserves (P50). Estimates of proved and probable reserve quantities are uncertain and change over time as new information becomes available. Contingent resources that may become proved in the future are excluded from the reserve numbers in the table below.

Proved and probable reserves	**mill bbls of oil equivalents (mmboe)**
Reserves at 01/01/2024	78.6
Revision of previous estimates	-9.1
Discoveries, additions, and extensions	10.2
Year 2024 production	-9.5
Reserves at 31/12/2024	**70.2**

IIN accounts only for reserves of crude oil in the Tampen fields, where reserves of NGL and dry gas have very little net economic value for the company. In the other fields the natural gas liquids and dry gas are included.

Following the final redetermination on Vega Unit, volumes are being redelivered from the PL 090 C owners. Such redelivery of volumes is accounted for at the time of redelivery and not accrued for in advance.

NOTE 19 LEASING

The incremental borrowing rate applied in discounting of the nominal lease liability is 3.20 %. Reference is made to Accounting principles.

all amounts in million NOK	**2024**	**2023**
Lease liability 1 January	16	22
Interest expense on lease liability	0	1
Foreign exchange loss (gain) on lease liability	0	0
Payments of lease debt (cash outflow)	-5	-6
Lease liability 31 December	**12**	**16**
Carrying amount of Right-of-use assets 31 December	12	16

The company has one leasing agreement which is deemed to be within the scope of IFRS 16 in 2024:

	Lease object	**License**
1	Office building	-

The company has no variable lease payments within the scope of IFRS 16 or short-term leases below 1 year. The expense relating to leases of low-value assets is negligible. The identified leases have no significant impact on the company's financing or dividend policy. The company does not have any residual value guarantees. Extension options are included in the lease liability when, based on management's judgement, it is reasonably certain that an extension will be exercised. No extension options are currently included in the leases.

NOTE 20 OTHER LIABILITIES AND COMMITMENTS

IIN, as all other oil companies operating on the Norwegian Continental Shelf, has unlimited liability for possible compensation claims arising from its offshore operations, including pollution. To cover these liabilities, IIN has obtained insurance covering such liabilities up to 150 million USD for 100 % share. The deductible is 10 million USD. Liabilities arising from well blow-outs are covered up to 270 million USD for a 100 % share. In case that liabilities arising from well blow-outs of which the water depth is more than 3,000 ft or located in the Barents Sea, those are covered up to 400 million USD for a 100 % share, with a deductible of 10 million USD.

Offshore assets are insured at replacement value with third party insurance companies.

Through its license ownership interests, IIN has certain obligations for future investments and drilling activities. Total committed investment for exploration well drilling was 285 million NOK (IIN share) at 31 December 2024, related to exploration wells in PL 1194, PL 057 and PL 090.

There are also substantial investments planned in fields where PDOs are not yet submitted or approved by the government, and production well drilling is planned in various producing fields.

IIN is committed to certain dry gas delivery, transportation, and processing obligations as an integral part of the license activity. These obligations are not in excess of planned future production.

The company has provided a standard parent company guarantee to the Ministry of Energy, to guarantee fulfilment of obligations undertaken by the licensee towards the State or Norwegian public institutions, and for the licensee's other possible liabilities in connection with petroleum activities.

NOTE 21 TRANSACTIONS WITH GROUP COMPANIES

IIN has 580 million USD in term deposits and 66 million USD in overnight deposits in INPEX Financial Services Singapore (IFSS) at 31 December 2024. The deposits are included in the cash pooling arrangement of the INPEX group. Interest terms on the term deposits are Treasure Bill Rate + spread.

Other transactions with group companies are negligible.

NOTE 22 R&D

all amounts in '000 NOK	**2024**	**2023**
R&D expense	821	844

The R&D activity consists mainly of participation in common industry projects. IIN will also pay R&D charged to the partner-operated licenses under the sliding scale rules by other operators.

NOTE 23 INVENTORY

all amounts in '000 NOK	**2024**	**2023**
Underlift	14 366	33 805
Spare parts and other stock items	91 443	84 597
Total	**105 809**	**118 402**

Directors' report 2024

THE NATURE AND LOCATION OF THE BUSINESS
INPEX Idemitsu Norge AS (IIN) is engaged in the exploration for and development and production of crude oil and natural gas on the Norwegian Continental Shelf (NCS). The company is located in the municipality of Bærum. The company changed its name from Idemitsu Petroleum Norge AS to INPEX Idemitsu Norge AS (IPN) on 31 January 2022, following a change in the ultimate majority shareholder.

IIN (formerly IPN) was founded on 25 September 1989. On 2 October 1989, a 9.6 % interest in production licences (PL) 057 and 089 was acquired from Equinor (Statoil). These production licences are located in the Tampen area in the northern North Sea, and comprise the Snorre, Tordis, Statfjord Øst, Sygna and Vigdis fields. The Statfjord Øst and Sygna fields were divested in 2024.

In 2002, IIN acquired a 15 % interest in the Fram area as part of a State Direct Financial Interest (SDFI) divestment. Production from Fram Vest and Fram Øst commenced in 2003 and 2006, respectively. The Vega Sør development in PL 090 C was completed in 2010, and oil and gas production commenced via the Gjøa platform. IIN holds a 3.3 % interest in the unitised Vega field. In 2014, production commenced from the unitised Fram H-Nord field, in which IIN has a 28.8 % interest. In March 2015, production commenced from the Knarr field in the northern North Sea, in which IIN holds a 25 % interest. The Knarr field ceased production on 1 May 2022. In 2017, the development of the Byrding field was completed with a tie-back to Fram. In August 2021, the Duva field commenced production through the Gjøa platform. IIN holds a 30 % interest in the Duva field.

In total, IIN has participating interests in 8 producing fields on the NCS.

In December 2024, IIN signed an agreement to acquire a 30% interest in the Trudvang CCS project from Sval Energi. The transaction is expected to be completed in 2025. After Hywind Tampen, this is IIN's second entry into a decarbonisation initiative.

IIN is part of the Japanese INPEX Group and is wholly owned by INPEX Norway Co., Ltd. (formerly Idemitsu Snorre Oil Development Co., Ltd.), a Japanese company registered in Tokyo. A majority of the shares in INPEX Norway (50.5 %) is held by INPEX Corporation. The remaining 49.5 % is held by Idemitsu Kosan Co., Ltd.

IIN's business is the exploration for, development, production and sale of hydrocarbons in a sustainable manner.

GOING CONCERN
In accordance with § 3-3a of the Accounting Act, it is confirmed that the going concern assumption is satisfied and this assumption has been applied in the preparation of the accounts.

EXPLORATION & PORTFOLIO
IIN participated in drilling campaigns for five exploration wells in 2024: two in the Northern North Sea, one in the Vøring Basin and two in the Barents Sea.

Exploration well 35/11-30 S and sidetrack 35/11-30 A targeted the Rhombi prospect in PL 090 in the greater Fram area. The primary and secondary exploration objectives of the well were to prove hydrocarbons in Upper Jurassic sandstone reservoir in the Sognefjord and Fensfjord formations. Well 35/11-30 S encountered gas in the Sognefjord Formation and well 35/11-30 A proved gas and oil in the Sognefjord Formation and oil in the Fensfjord Formation. The licencees will evaluate the discovery for development via future or existing Fram infrastructure to the Troll C platform.

The Cerisa prospect was drilled in PL 636 located in the north of Gjøa by well 36/7-5 S and its three side-track wellbores. The primary objective of the well was to prove hydrocarbons in the sandstone reservoir of the Lower Cretaceous Agat Formation. The objective of sidetracks 36/7-5 A and C was to delineate the discovery in well 36/7-5 S, as well as to prove the oil/water contact. The objective of sidetrack 36/7-5 B was to prove hydrocarbonsin Agat Formation sandstone reservoir in a separate prospect (Cerisa West). PL 636, which was awarded in 2012, already includes the Duva field, which is tied-back to the Gjøa platform for processing and export. This makes it possible to develop the Cerisa discovery utilising existing infrastructure, which will reduce cost and time to production start.

In the Vøring Basin, well 6605/6-1 S in PL 1194 drilled the Haydn and Monn prospects, south-west of the Aasta Hansteen field. The primary and secondary exploration targets for the well were potential gas accumulations hydrocarbons in the Upper Cretaceous Springar and Nise formations. Discoveries were made in both the Springar formation (Haydn) and in the Nise formation (Monn). In addition, a third gas-bearing sandstone reservoir was proved in the lower Springar Formation. The licencees will evaluate the discoveries for possible future development.

Two wells were drilled in PL 1170 in the Barents Sea, close to the Wisting discovery, to prove hydrocarbons in the Middle Jurassic to Upper Triassic sandstone reservoir of the Stø and Fruholmen formations. The aim was to prove additional oil volumes to the Wisting development. Well 7324/6-2 in the Ferdinand Nord prospect encountered gas in the Stø Formation and in the Snadd Formation. Well 7324/8-4 encountered gas in the Stø and Fruholmen formations in the Hassel prospect.

In the Awards in Pre-defined Area 2023 (APA 2023), IIN was awarded five production licences. These were PL 1233 in the Vøring Basin and PL 1153, PL 1217 and PL 1219 in the north of Gjøa in the Northern North Sea. In addition, IIN was also awarded a licence extension to PL 1194 B in the Vøring Basin. PL 1217 was the second licence to be operated by IIN after the consolidation of IIN and INPEX Norge, following three earlier operated licences on the NCS prior to the consolidation. IIN intends to actively participate in future licensing rounds, both as operator and partner, and will continue to seek further investment opportunities on the NCS.

There are several promising discoveries in IIN's portfolio, and IIN is working with the operators to find robust development solutions in terms of commodity price sensitivity and climate emissions.

PRODUCTION & OPERATIONS
Total net oil and gas production from IIN's producing fields was 11 % lower in 2024 than in 2023. The decrease was caused by the producing fields now being in the decline phase of oil production. No new fields were put into production in 2024. IIN's oil production decreased by 17 %, while the gas production increased by 6 %. It is expected that this gradual shift towards an increasing gas production share will continue in the coming years.

In the Tampen area, more specifically in the Snorre field and its subsea satellite fields, the Tordis field and Vigdis field, production was stable, albeit with a slight decline as anticipated. Additionally, the Tordis production was reduced due to scaling in one of the wells.

Hywind Tampen has been in operation throughout 2024, achieving total CO2 savings of 73,220 tonnes as IIN net in Snorre operation. Due to the failure of the inverters, the production of electrical power and saving of CO2 fell below the 2024 budget targets, however following their replacement, production and CO2 savings have improved significantly.

In the Fram area, daily oil and gas production was stable. The recent discoveries in the Fram area, the Echino Sør and the Blasto fields, collectively referred to as the Fram Sør project, successfully passed the DG2 milestone in June 2024. DG3 (final investment decision) and Plan for Development and Operation (PDO) are planned for June 2025.
The decommissioning of the Knarr field is being executed according to plan, with all wells successfully plugged back during 2024.

In PL 636, the Duva field achieved its third year of full production. Despite an anticipated decline in production, the Duva field produced significantly above its planned production volume, primarily due to sufficient capacity at the receiving facilities at the Gjøa platform host.

In PL 537, the Wisting Reshape Project (WRP) resumed immediately after the decision in December 2022 to postpone an upcoming investment decision. The project has been working to mature the concept, targeting a Concept Selection (DG2) in 2026. A data acquisition well was successfully drilled in early 2024 to obtain geomechanical data from the overburden of the reservoir of the Wisting field. The obtained well data proved valuable for further optimisation and understanding of the subsurface as well as for planning of reservoir monitoring.

The Dugong discovery in PL 882 (Tampen area), the Grosbeak discovery in PL 090 JS (Fram area), the Kveikje discovery (Fram area), the Mulder discovery (Fram area) and the Cerisa discovery in PL 636 are being matured with the aim of submitting PDOs. All discoveries are likely to be developed as subsea tie-backs to existing infrastructure.

REPORT ON THE ANNUAL ACCOUNTS

(1) Statements of revenue

IIN posted profit after tax of 1 364 million NOK in 2024 (2023: 1 609 million NOK). The decrease in profit is primarily due to lower production volume and commodity prices. Crude oil revenue decreased by 1 191 million NOK, while dry gas revenue decreased by 241 million NOK.

The depreciation and process tariff decreased compared to 2023 due to lower oil production. Gas transportation cost has increased due to higher gas production. Other production costs are relatively stable.

IIN has reviewed its producing fields and exploration assets for potential impairment loss. Based on this review, it has been concluded that no impairment is required for IIN's producing fields or capitalised exploration wells in 2024.

IIN has significant interest income from its deposits in the INPEX Group's cash pooling arrangement. Net FX gain/loss is limited due to a balanced exposure in USD.

(2) Balance sheets

IIN has no long-term loans at year-end 2024. A dividend of 669 million NOK was paid to the shareholder in

December 2024. Equity represents 53 % of total assets as of 31 December 2024.

The asset value of production facilities in operation decreased by 922 million NOK in 2024. Significant investments were made in Snorre, but these were exceeded by the depreciation cost. The company also divested its shares in Statfjord Øst and Sygna in 2024.

Exploration wells capitalised under the Successful Efforts method increased by 398 million NOK, mainly due to the discovery of Cerisa in PL 636 and Rhombi in the PL 090 area.

Provision for Asset Retirement Obligations (ARO) has decreased by 338 million NOK. This is primarily due to the divestment of Statfjord Øst and Sygna and extended lifetime expectation for Snorre.

Payable tax liability has decreased significantly compared to 2023 due to lower profit.

(3) Cash flow statements
Total investment in production facilities in 2024 was 483 million NOK, compared to 673 million NOK in 2023. A large part of the investment has been made in Snorre and PL 089 in order to maintain optimal production in the forthcoming years.

Cash flow from operations is significantly lower than the operating profit. The primary differences between cash flow from operations and operating profit can be attributed to depreciation and tax payments. Tax payments were close to 4 billion NOK in 2024. Cash flow from operations has also been reduced impacted by decommissioning expenditure, mainly on Knarr.

Excess cash is deposited in the INPEX Group's cash pooling arrangement.

The board is not aware of any matters that are important for an assessment of the company's position and results that are not set out in the annual accounts. Similarly, no matters have occurred after the end of the financial year that in the opinion of the board are material to an assessment of the accounts.

FINANCIAL RISK

GENERAL INFORMATION RELEVANT TO FINANCIAL RISKS
IIN's activities expose the company to market risk (including commodity price risk and currency risk), liquidity risk and credit risk. The company's approach to risk management includes assessing and managing risk with a focus on achieving the highest risk adjusted returns for the shareholders.

COMMODITY PRICE RISK
The company operates in the crude oil and natural gas market and is exposed to fluctuations in oil and gas prices that can affect revenues. No hedging activities are carried out to reduce the market price risk.

CURRENCY RISK
The company has most of its income in USD and cost in NOK. Most of the USD to NOK currency exchange risk is covered by short-term foreign exchange contracts. Risk reductions by using the aforementioned financial instruments will never exceed the actual risk position.

LIQUIDITY RISK
Liquidity risk is the risk that the company will not be able to meet obligations of financial liabilities when

they become due. The purpose of liquidity management is to make certain that the company always has sufficient funds available to cover its financial liabilities. The company has no long-term loans and a comfortable cash position. The cash flow from fields in production is strong and sufficient to cover the company's financial obligations even when the crude oil price is fairly low. It is expected that the company has substantial loan capacity based on the security of its producing assets.

CREDIT RISK

Credit risk arises from cash and cash equivalents, favourable derivative financial instruments and deposits with banks and financial institutions. There are also minor credit exposures related to trade receivable and joint venture overcalls toward licence partners. The company's licence partners are credit-worthy oil companies, and cash and cash equivalents are receivable from banks and the INPEX Group.

HEALTH, SAFETY AND ENVIRONMENT (HSE)

Health, Safety and Environment (HSE) excellence is considered a business imperative in IIN. Ensuring safety and health at work remains our shared top priority and we aim to maintain a safe, comfortable and zero-incident workplace, rooted in our safety culture. As part of our culture, our IIN organisation is encouraged and empowered to speak up and take action to stay safe and we are always looking for ways to improve.

There were no major accidents or incidents resulting in fatalities related to our activities in 2024. However, there were 45 (41 in 2023) safety incidents reported to authorities on our partner-operated licences. The partner-operated licences also publish annual environmental reports in a standard format.

IIN oversees partner-operated exploration, field development, production and decommissioning activities through our own independent evaluation and reviews of applications and plans to ensure these are in accordance with Norwegian regulations and IIN's expectations. As part of IIN's see-to-it duty, IIN further follows up activities in partner workshops and by actively participating in all partner-led follow-up activities.

IIN remains committed to maintaining a vibrant workspace by promoting employee health and maintaining and improving the work environment in order to prevent and mitigate long-term sick leave. The total sick leave for 2024 was 1.03 % (2.53 % in 2023) of total expected employees work-days.

During 2024, IIN continued to improve the IIN Company Management System (CMS) by updating existing documents and where required introducing new elements aligning with INPEX policies and procedures. An independent review of the CMS was undertaken in 4Q 2024 to identify further areas for improvement in the system.

EMPLOYEES, ORGANISATION, AND WORKING ENVIRONMENT

During 2024, IIN maintained a focused pursuit of strategic objectives, driving significant activity across the organisation.

At the end of 2024, the company's workforce included 78 employees and a total of 81 staff members.

To optimise IIN's organisational structure moving forward to meet with IIN's ambitious strategy and targets, a realignment was implemented early in the year. This change has resulted in a more efficient and resilient organisation. The new structure fosters a work environment with opportunities for our employees to engage in diverse projects and tasks, enabling them to thrive and effectively contribute within their roles. The survey conducted late in the year received positive feedback from employees, confirming that the changes resulting from the realignment have been successfully embraced across the organisation.

We clearly recognise that the essential contributions of our highly skilled and dedicated employees are crucial to our operational success.

Throughout the year, we continued fostering collaboration with our employees, through regular and ad-hoc information and consultation meetings with IIN's Safety Delegate and employee representatives. This interaction ensures valuable insights into the working environment and operational processes, ensuring that employee voices remain integral to our governance. The engagement of our employees was also manifested through a new election for employee-elected members to the IIN Board of Directors, where there are two members elected by the employees and four deputy members.

Maintaining a healthy work-life balance for our employees has also continuously been a priority for IIN. We encourage and promote this balance through initiatives such as the flexi-time arrangement and the possibility to work remotely several days a week.

In terms of our compensation and benefits package, we continually strive to align with the current legislation and industry standards.

IIN upholds a strong commitment to transparency, accountability, and ethical standards, ensuring responsible operations across all business areas. Our Transparency Act Due Diligence Report for 2023 was published on June 27, 2024, following a comprehensive assessment of our supply chain to identify and mitigate potential risks, in full adherence to the Norwegian Transparency Act, Section 5.

DIVERSITY, EQUAL OPPORTUNITY, INCLUSION AND BELONGING

At IIN, we remain unwavering in our commitment to fostering a workplace that values diversity, equality, inclusion, and belonging (DEIB). Our objective is to cultivate an environment where every team member feels valued, respected, and empowered to achieve their full potential.

A key component of our diversity is our international workforce. Nearly half of our employees have origin from countries outside of Norway, thus bringing a rich array of cultural perspectives and experiences. This diversity enhances our company culture and broadens our understanding of various challenges and opportunities.

Our Equal Opportunities Policy is fundamental to our commitment to DEIB, ensuring equitable treatment for all employees, regardless of age, disability, gender identity or expression, marital or civil status, maternity, ethnicity, nationality, religion or belief, sex, or sexual orientation.

Throughout the year, we have strengthened our alignment with the Activity and Reporting Obligation (ARP) by collecting and analysing data and assessing follow-up activities. Notably, we organised a lecture on "Unconscious Bias," which generated substantial interest among our employees.

As at the end of 2024, women constituted 31 % of our workforce, with 29 % representation on our Management Committee and 45 % representation on our Board of Directors.

We had one female employee working on a voluntary part-time basis and three temporary consultant positions as of the end of the year.

There were no reports of incidents through the INPEX Global whistleblowing procedure in 2024, reflecting our ongoing efforts to maintain a transparent and respectful workplace.

For a more detailed insight into our DEIB initiatives and outcomes, please refer to the relevant chapter of the annual report.

RESEARCH AND DEVELOPMENT ACTIVITIES

IIN executes most of its R&D projects as common industry projects, with relevance for the company's activities in open and licenced exploration areas and in producing fields. IIN also contributes with significant amounts to general and specific R&D activities undertaken by the operators of the fields in which IIN has an interest.

PAYMENTS TO AUTHORITIES

The company has prepared a report about payments to authorities, which has been published on the company's website, www.inpex-idemitsu.no.

OUTLOOK

IIN's annual profits are closely linked to the prices of crude oil and dry gas and foreign exchange rates. These elements are subject to fluctuation and are difficult to estimate. Both the oil price and gas prices have decreased slightly compared to 2023 but remain at relatively high levels. Product prices are expected to remain around current levels in 2025.

In 2023, the company signed an agreement to divest its participating interests in the Statfjord Øst field and the Sygna field with an effective date of 1 January 2023. The transaction was completed in January 2024. The divestment has only a marginal impact on the company's production and reserves.

Due to the stable income from the company's production fields with a low/moderate cost level, IIN can be profitable even at fairly low crude oil price levels. The company's liquidity is robust and it currently has substantial deposits and no long-term loans. It is assumed that the company has significant borrowing capacity both on a stand-alone basis and with backing from the INPEX Group. On this basis, the board is confident that the going concern assumption remains valid.

The annual profit is also affected by the crude oil and gas production and its sales volumes. All of the company's producing fields are at a declining stage. However, the company has several discoveries that are currently evaluated for development in its portfolio which will contribute to maintaining the production levels in the coming years.

ANNUAL RESULT AND ALLOCATIONS

In 2024, the company had a result after tax of NOK 1 364 286 093, which is proposed to be allocated as follows:

Disposition	**Amount**
Allocation to dividend	0
To other equity	1 364 286 093

Søknad om tillatelse til utarbeide årsregnskap og årsberetning på engelsk språk for Idemitsu Petroleum Norge AS, org. nr. 953 133 210

Det vises til Deres brev av 23. februar 2010 samt telefonsamtale i sakens anledning. De søker på vegne av Idemitsu Petroleum Norge AS om tillatelse til å utarbeide årsregnskap og årsberetning på engelsk språk.

Idemitsu Petroleum Norge AS er 100 % eid av det japanske selskapet Idemitsu Snorre Oil Development Co., Ltd, som er et selskap i Idemitsu Kosan konsernet. Idemitsu Kosan som er konsernspiss er notert på børsen i Japan. Konsernspråket er engelsk/japansk. Selskapet er 100 % egenkapitalfinansiert av morselskapet. 3 av 5 styremedlemmer og toppledelsen i selskapet er japanske statsborgere.

Etter regnskapsloven § 3-4 tredje ledd skal *"årsregnskapet og årsberetningen ... være på norsk. Departementet kan ved ... enkeltvedtak bestemme at årsregnskapet og/eller årsberetningen kan være på et annet språk."*

I Ot. prp. nr. 42 (1997-1998) Om lov om årsregnskap m.v., er det uttalt følgende om regnskapslovens formål, jf. pkt. 1.1:
"Regjeringen har som siktemål at regnskapsloven skal bidra til informative regnskaper for ulike grupper av regnskapsbrukere. Regnskapsbrukerne er dels investorer og kreditorer som tilfører kapital til foretakene, og dels andre grupper som har interesse av å vite hvordan foretaket drives, f.eks. de ansatte og lokalsamfunnet. Informasjonen til kapitalmarkedet skal gi grunnlag for riktig prising av finansielle objekter. Riktig prisdannelse på aksjer er en forutsetning for at ressursbruken i samfunnsøkonomien skal bli best mulig. Gode regnskaper vil også gjøre det vanskeligere for markedsdeltakere å ta ut spekulasjonsgevinster med basis i skjevt fordelt informasjon."

Det fremgår således at et av hovedformålene med regnskapsloven er å bidra *til "informative regnskaper for ulike grupper av regnskapsbrukere"*. Regnskapsbrukere vil omfatte, jf. uttalelsen i proposisjonen, blant andre investorer, kreditorer, ansatte og lokalsamfunnet. Offentlige myndigheter må også anses som en sentral regnskapsbruker, idet ulike myndigheter, som lignings- og tilsynsmyndigheter, benytter regnskapene som sentrale verktøy i sin kontrollvirksomhet.

Det er etter Skattedirektoratets vurdering derfor avgjørende at spørsmål om dispensasjon fra kravet til å utarbeide årsregnskap og/eller årsberetning på norsk, at det ikke foreligger mulige brukere av regnskapsinformasjon som blir negativt berørt ved en eventuell dispensasjon. Søkeren må som et utgangspunkt for vurderingen ha en særlig interesse for kun å utarbeide årsregnskap og/eller årsberetning på et annet språk enn norsk.

Som nevnt ovenfor er det særlig hensynet til brukerne av regnskapsinformasjon som skal vurderes ved en dispensasjonssøknad. Selskapet er heleid av det japanske selskapet Idemitsu Snorre Oil Development Co., Ltd, som er et selskap i Idemitsu Kosan konsernet. Idemitsu Kosan som er konsernspiss er notert på børsen i Japan. Konsernspråket er engelsk/japansk. Selskapet er 100 % egenkapitalfinansiert av morselskapet. 3 av 5 styremedlemmer og toppledelsen i selskapet er japanske statsborgere. Skattedirektoratet legger derfor til grunn at det i dette tilfellet ikke syntes å være brukere av selskapets regnskapsinformasjon som foretrekker å få dette på norsk språk.

Skattedirektoratet gir på bakgrunn av en helhetsvurdering Idemitsu Petroleum Norge AS tillatelse til å utarbeide årsregnskap og årsberetning på engelsk språk, jf. regnskapsloven § 3-4 tredje ledd.

Dispensasjonen er gitt under den forutsetning at de ovennevnte opplysninger som vedtaket baserer seg på ikke endres vesentlig.

Vennligst oppgi vår referanse ved henvendelser i anledning saken.

Med hilsen

Jan Hoelstad
